

Grassroots Action Alert

In June, SB 225 was passed unanimously out of the Senate Banking and Insurance Committee. This progress means that patients are one step closer to having better access to care, but now we need the full Senate to act.

We must have a quicker, more efficient prior authorization system and a clear route to obtain exemptions from the step therapy process. Indeed, during the current pandemic, many insurers dropped prior authorization for COVID-19 treatments because they recognize patients cannot wait for appropriate care - the same must go for all patients and all appropriate treatments.

Now we need the full Senate to take up SB 225 and vote yes to pass the bill.
